Reason for allowance

1. This communication is in response to applicant's 09/09/2004 Amendment in the application of Ayyagari et al. for an "Integrated method for performing scheduling, routing and access control in a computer network" filed 11/30/2000. The proposed amendment to the claims and response have been entered and made of record. Applicant's argument and explanation with regard to the rejection under 35 USC 103 are persuasive. The claims have been amended to better point out and more distinctly claim subject matter comprising the invention.

In view of applicant's amendment to amend the claim 23, and have eliminated the phrase "capable of". Therefore, examiner has withdrawn the Objections of record to claim 23.

The rejection of record with respect to claims 1 and 23 under 35 U.S.C. § 112, second paragraph are hereby removed based on applicant's amendment.

2. Claims 1-36 are allowable as evident by applicant's amendment.

3. The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a no obvious improvement over the prior art of record. The improvement comprises the feature to the sending data packets in slots delineating time frames on the network between the nodes on the network defined by the links; allocating the network-wide capacity among each of the nodes in the at least one of a cluster and a clique at the beginning of a time frame on the network, wherein the network-wide capacity allocated to each of the nodes in the at least one of a cluster and a clique is performed based upon at least one

node-level performance metric of the network, and repeating the capacity allocating step at the beginning of each time frame, as specifically recited in the claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
